

FUEL ADDITIVES

BIOBORDC

Diesel Fuel Conditioner *Winter Blend*

BioborDC® *Winter Blend* is a multifunctional **cold-weather diesel fuel conditioner** to enhance the stability and operability of ultra-low sulfur diesel fuels. Components of **BioborDC®** will provide exceptional fuel stability, added lubricity, detergency and anti-gelling. With continued use, **BioborDC®** enhances the performance and life of diesel fuels while protecting and cleaning vital engine components, maintaining fuel economy and reducing emissions.

What does BioborDC *Winter Blend* do for you?

- ✔ **Fuel Stability** **Contains an ashless thermal stability additive formulated to prevent the degradation of mid-distillate fuels.**
 - Prevents problems associated with gum and residue
 - Reduces diesel degradation and sludge formation
 - Allows longer storage periods and decreases filter/injector plugging

- ✔ **Lubricity** **Adds vital fuel lubricity increasing the lubrication properties of ULSD.**
 - Protects fuel injectors and fuel pumps
 - Extends the life and prevents pre-mature wear of close tolerance components.
 - Provides additional corrosion protection

- ✔ **Detergent** **A multifunctional, ashless additive package to improve fuel quality and engine operation by cleaning injectors and particulates.**
 - Meets Cummins L-10 performance requirements for detergency
 - Keeps injectors clean—prevents injector sticking and plugging
 - Improves fuel economy
 - Reduces emissions and smoke
 - Reduces power loss
 - Prevents fuel filter plugging from deposits
 - Reduces deposits throughout fuel system
 - Achieves Peugeot DW-10 Injector Coking Test—Keep Clean rating
 - Additional corrosion and stability protection

- ✔ **Cold Flow Improvers** **A unique blend of EVA copolymers to improve winter operability**
 - Lowers the cold filter plug point and reduces the pour point of diesel fuels
 - Inhibits wax crystal growth and also prevents ice formation

Treat Rate...

Use at a ratio of
1 gallon to every 1,500 gallons
of diesel fuel

*Ultra-Low Sulfur Diesel compliant
Contains less than 15ppm sulfur

Other Hammonds Products...

BIOBORJF® Diesel biocide and lubricity additive
The Worldwide Standard Since 1965

ColdFlo® Concentrated diesel antigel, de-icer and
lubricity additive, for cold-temperature operation

BIOBORDC® *Summer Blend* for warm-weather operation
Moisture dispersants replace cold-flow improvers
