

# BIOBOR® EB

for all gasoline and...

**For E10 and E15 Blends**

**Stabilizes Ethanol in fuel for up to 18 months and enhances engine performance.**

**ALL 2 AND 4 CYCLE ENGINES**

Available in 4, 8, 16 and 32 oz. bottles as well as 1 gallon jugs, 5 gallon pails and 55 gallon drums

A Product of

**FUEL ADDITIVES**

6951 West Little York Road • Houston, Texas 77040 • (800) 548-9166

## BIOBOR® EB

**Protection Against E10 and E15 Ethanol-Blended Gasoline**

## BIOBOR®

The Worldwide Standard Since 1965

HFA-837 REV 11/16

# BIOBOR® EB

the **ETHANOL BUSTER** and **PERFORMANCE ENHANCER**

# COMBATS

the harmful effects of

# ETHANOL

in **ANY** gasoline engine.

for all gasoline and...

**For E10 and E15 Blends**

from **Biobor® Fuel Additives**  
The Worldwide Leader in Fuel Treatment  
SINCE 1965

# The Problem...

## E10 and E15

# ETHANOL

## Blended Gasoline

### Fuel Phase Separation

Ethanol is extremely corrosive and readily combines with naturally occurring water in fuel tanks. When this combination reaches a certain point, the ethanol and water mix drops out of the fuel to the bottom of the tank. Since the fuel intake is located at the bottom of the fuel tank, the engine draws slugs of ethanol and water instead of the intended fuel mix. This can damage vital engine parts as well as adversely effect the engine's performance and efficiency while lowering the fuel's octane rating by up to 6 numbers.

# The Solution...

# BIOBOR®EB

## Ethanol Buster and Performance Enhancer

### GASOLINE TREATMENT Marine/Auto/Power Equipment

## The Ethanol Buster and Performance Enhancer

Combats the harmful effects of E-10 and E-15 Ethanol blends and increases engine efficiency...

Cleans power-robbing carbon deposits from injectors and intake valves.

## COMPLETE ENGINE PROTECTION

- ✓ Prevents fuel phase separation
- ✓ Cleans the entire fuel system of carbon deposits and varnish
- ✓ Prevents corrosion, rated "best choice"
- ✓ Adds lubricity to protect elastomers
- ✓ Stabilizes stored gas up to 18 months
- ✓ Increases performance and efficiency
- ✓ Excellent for both 2 and 4 cycle engines
- ✓ Alcohol free treatment
- ✓ For regular gasoline, E10 and E15 Ethanol blends

**BioBor®EB** is a multi-purpose gasoline additive designed specifically to combat the harmful effects of ethanol in gasoline by **stabilizing** the fuel/ethanol/water mix in your fuel tank. Ethanol is very **corrosive** to vital engine parts and if not in the proper mix with fuel, can damage these parts severely and even cause total failure.

**BioBor®EB** stabilizes the fuel, preventing the wrong ethanol/fuel mix which can cause **loss** of the fuel's **octane rating** as well as **loss** of an engine's **performance, efficiency** and **economy**.

**BioBor®EB** also **keeps fuel fresh** by preventing oxidation breakdown for up to 18 months and removes power-robbing carbon deposits for a **better performing, more efficient engine**.

**BioBor®EB** should be used regularly at every fill-up for a cleaner, better performing engine.

**BioBor®EB** is completely **safe to use** in any gasoline-powered engine, gasoline/oil mixtures and ethanol blends.

Use of **BioBor®EB** will not void any engine warranty.

The  
**ALLinONE**  
Additive

- ✓ Stabilizes fuel
- ✓ Prevents ethanol issues
- ✓ Cleans entire system

## TREATS MORE FUEL!

1 ounce of **BioBor®EB** treats

**15** gallons of gas
